- *Best-in-class in-cab space, comfort and visibility with superior ergonomics in the Horizon™ cab*
- *Blue Power version for the ultimate experience in comfort and exclusive features*

PRESS RELEASE

New Holland Agriculture extends the T5 Series with the new T5 Auto Command™ range, featuring its award-winning continuously variable transmission. The new models offer best-in-class in-cab space and ultimate comfort, resulting in premium driving pleasure combined with industry leading performance and power ratings. The new T5 Auto Command™ offers the ideal features for increased versatility in grassland operations, arable farming, transport, cultivation & municipal work.

Sean Lennon, Head of the Tractors Product Line, says: “The new T5 Auto Command™ is ideal for mixed farmers, medium sized dairy operations and professional farmers where loader work is key. The new range caters for those who need a highly manoeuvrable & versatile tractor designed for high PTO work such as mowing, baling, light tillage, ground preparation and transport.”

The new T5 Auto Command range was awarded a mention by the jury panel of the Technical Innovation Contest at the EIMA International exhibition, which particularly appreciated the innovative life-long exhaust gas after-treatment system.

### **Seamless productivity with the award-winning AutoCommand™ continuously variable transmission technology**

The multi-award winning AutoCommand continuously variable transmission delivers the versatile T5's all-round performance in those jobs where exact speeds are critical. The three-stage acceleration and deceleration setting perfectly matches the performance to each task: the soft setting is for gentle direction changes, perfect during high speed transport or when working on slippery surfaces; the standard setting for normal field activities; and the super-fast aggressive setting guarantees near instantaneous direction changes. The extreme manoeuvrability, together with the smooth shuttle shifting, makes T5 AutoCommand ideal for loader work.

PRESS RELEASE

**Industry leading power and clean operation with the new FPT NEF Stage V engine and ECOBlue™ HI-eSCR2 Stage V technology**

The well proven NEF four-cylinder, 4.5 litre engine developed by FPT Industrial delivers a powerful performance, with maximum outputs ranging from 110 to 140 hp – up to 20 hp more than the current T5.120 ElectroCommand™ model. The T5 AutoCommand meets Stage V emissions standards with the NEF engine and the new Hi-E-SCR2 technology developed by FPT Industrial. This innovative after-treatment system is a maintenance-free solution that minimizes operating costs, and is all packaged neatly under the hood, allowing maximum visibility. Its compact size, lack of EGR and simple layout add to its extreme reliability.

**Best-in-class in-cab space, comfort and visibility with superior ergonomics in the Horizon™ cab**

The T5 AutoCommand offers the best operator environment in its class with the industry leading Horizon™ cab. The unprecedented feeling of space, remarkably low in-cab noise levels, superior ergonomics, advanced and intuitive features of the SideWinder™ armrest allow the new models to offer exceptional operating comfort. The best-in-class all round visibility, provided by the single piece front screen and ample glazed areas is further enhanced by the enlarged wing mirrors with adjustable top section that offer the best possible view of the road in high-speed transport.

**Blue Power version for the ultimate experience in comfort and exclusive features**

The T5 AutoCommand range will be offered in 4 models, ranging from 110 – 140 maximum horse power. For those who are looking for the ultimate in comfort and exclusive features, the top rated T5.140 model will be available in the Blue Power version. It joins the Blue Power family that has become synonymous with ultimate comfort, cutting edge technology and eye-catching design.

Model	Rated Engine Power (hp)	Max Power (hp)
T5.110 AutoCommand	100	110
T5.120 AutoCommand	110	120
T5.130 AutoCommand	120	130
T5.140 AutoCommand	130	140
